8 kyu **Sum without highest and lowest number**

1665 340 88% of 8,738 42,118 of 118,381 user5036852

1 Issue Reported

Python 3.11 VIM EMACS

Instructions Output

Task

Sum all the numbers of a given array (cq. list), except the highest and the lowest element (by value, not by index!).

The highest or lowest element respectively is a single element at each edge, even if there are more than one with the same value.

Mind the input validation.

Example

Solution

```python
def sum_array(arr):
    #your code here
```

---

8 kyu **Sum without highest and lowest number**

1665 340 88% of 8,738 42,118 of 118,381 user5036852

1 Issue Reported

6 kyu 233

Python 3.11 VIM EMACS

Instructions Output

Time: 487ms Passed: 50 Failed: 0

Test Results:

Fixed Tests

- None or Empty (2 of 2 Assertions)
- Only one Element (2 of 2 Assertions)
- Only two Element (2 of 2 Assertions)
- Real Tests (4 of 4 Assertions)

Completed in 0.22ms

Random Tests

- Testing for sum_array([-12, -95, 149, -12, -43, -862, -14, 29, -57, 88, -6, -501, 303, -661, -75, 9, -846])

Solution

```python
def sum_array(arr):
    result = 0
    if not arr or len(arr) <= 2:
        return 0

    return sum(arr) - min(arr) -max(arr)
```

Outstanding! You may take your time to refactor/comment your solution. Submit when ready.

Sample Tests

```python
    @test.it( None or Empty )
    def basic_test_cases():
        test.assert_equals(sum_array(None), 0)
        test.assert_equals(sum_array([]), 0)
```

8 kyu **Volume of a Cuboid**

346 85 80% of 8,116 40,287 of 128,922 user5196477

Python 3.11 VIM EMACS

Instructions Output

Time: 471ms Passed: 52 Failed: 0

Test Results:

Testing...

- Sample tests (2 of 2 Assertions)
- Random tests (50 of 50 Assertions)

Completed in 2.95ms

You have passed all of the tests! :)

Solution

```python
def get_volume_of_cuboid(length, width, height):
    volume = length * width * height
    return volume
```

Correctamundo! You may take your time to refactor/comment your solution. Submit when ready.

Sample Tests

```python
import codewars_test as test
from solution import get_volume_of_cuboid
```

---

7 kyu **Sum of a sequence**

587 181 88% of 4,642 18,591 of 53,768 fyvfyv

1 Issue Reported

6 kyu 237

Python 3.11 VIM EMACS

Instructions Output

Time: 570ms Passed: 50 Failed: 0

Test Results:

Fixed Tests

- Basic Test Cases (10 of 10 Assertions)

Completed in 0.12ms

Random tests

- Testing for sequence_sum978, 555, 55
- Testing for sequence_sum486, 746, 96
- Testing for sequence_sum559, 597, 98
- Testing for sequence_sum126, 7, 64
- Testing for sequence_sum769, 145, 22

Solution

```python
def sequence_sum(begin_number, end_number, step):
    result = 0
    if begin_number > end_number:
        return 0

    for i in range(begin_number, end_number + 1, step):
        result += i
    return result
```

Correctamundo! You may take your time to refactor/comment your solution. Submit when ready.

Sample Tests

```python
import codewars_test as test
from solution import sequence_sum
```
