8 kyu **Convert boolean values to strings 'Yes' or 'No'.**

1355 341 89% of 23,252 129,550 of 395,327 weavermedia

2 Issues Reported

Python 3.11 VIM EMACS

Instructions Output

Complete the method that takes a boolean value and return a `"Yes"` string for `true`, or a `"No"` string for `false`.

FUNDAMENTALS

Solution

```
def bool_to_word(boolean):
    # TODO
```

Sample Tests

```
import codewars_test as test
from solution import bool_to_word

@test.describe("Fixed Tests")
def basic_tests():
    @test.it('Basic Test Cases')
    def basic_test_cases():
```

Test Results:

Fixed Tests

Basic Test Cases (6 of 6 Assertions)

should work for random numbers (100 of 100 Assertions)

Completed in 2.66ms

You have passed all of the tests! :)

Solution

```
import math

def is_square(n):
    return n>=0 and math.isqrt(n)**2 == n
```

Excellent! You may take your time to refactor/comment your solution. Submit when ready.

Sample Tests

```
import codewars_test as test
from solution import is_square

@test.describe("Fixed Tests")
def fixed_tests():
    @test.it('Basic Test Cases')
    def basic_test_cases():
        test.assert_equals(is_square(-1), False, "-1: Negative numbers cannot be square
        test.assert_equals(is_square( 0), True, "0 is a square number (0 * 0)")
        test.assert_equals(is_square( 3), False, "3 is not a square number")
```
